Welcome to Ceramics. I am very excited about what experiences and knowledge I can bring you through Ceramics.
The following information should be read and signed by both the student and parent/guardian.

**STUDENT’S RESPONSIBILITIES:**
- Arrive to class **on time**, prepared with a notebook, pencil, and all other materials you may be asked to bring on any specific day.
- Follow my basic classroom rules of Respect, Responsibility, and Recycling.
- Complete all assignments on time unless you have been legally absent from school.
- **Keep and extra clean environment**, and demonstrate safety when using all materials and tools. This includes preparing and cleaning up your own work area.

**GRADING POLICY:**
- All projects must be completed to be graded.
- Each project will receive multiple grades.
- Class Participation/Effort is also a significant factor of each grading period.
- The school supplies the majority of materials needed for Ceramics including clay, tools, and glazes. You the student, may be asked to bring in minor items like plastic bags, glass jars, and homemade tools which will assist you throughout the course. These items should be of little or no cost to you.

  **I am very excited about this year and can only hope to introduce you to a lifelong love of Ceramics.**

Sincerely,
Josie Hollander
HS Art Teacher

I have read and understand this syllabus and the responsibilities it includes.
